### PRODUCT DESCRIPTION:

The Iyaly Monoi and Coconut SPF 15 Sunscreen Lotion offers complete protection against UVB and UVA rays while also providing effective antioxidant action, preventing sunburn, dark spots, and solar erythema, allowing for a gradual tan in perfect safety. This sunscreen is the ideal ally for keeping your skin safe under the summer sun. The formulation is enriched with advanced UVA/UVB solar filters that are photostable and broad-spectrum, providing immediate immunity against harmful sun rays. The SPF 15 protection is particularly suitable for skin that is not extremely fair or has already been exposed to the sun, ensuring an even complexion and preventing sunburn.

### METHOD OF USE:

Apply SPF 15 sun cream by massaging in circular movements until completely absorbed, before exposure to the sun or UV lamps. Reapply to maintain its effectiveness, especially in the case of prolonged bathing. The application of an even layer, repeated during exposure, allows the skin to achieve its own degree of tan while maintaining effective protection.

### WARNINGS:

In case of contact with the eyes, wash immediately with water and consult a doctor if necessary. Do not disperse in the environment. Avoid dropping, knocks and improper handling which may cause the product to spill. Store in a cool, dry place and away from heat sources.
